Education

University of California, Santa Barbara

Bachelor of Science in Computer Science

Graduated: June 2026

Relevant coursework: Data Structures & Algorithm, Computer Architecture, Object Oriented Design, Computational Science, Machine Learning, Computer Network, Computer Security

Los Angeles Pierce College, Woodland Hills

Associate of Science: Mathematics, Physics

Associate of Arts: Mathematics, Social and Behavioral Science, Stem

Graduated: June 2024

Summa Cum Laude

Experience

Software Engineer Fellow

Headstarter AI

Remote

July 2024 - September 2024

- Led a fast-paced, 5-week engineering initiative, managing and collaborating with a cross-functional team of 3 to design, develop, and deploy five full-scale, production-ready applications
- Designed and delivered a diverse suite of applications, from the range of data-driven web platforms to AI-powered tools
- Engineered solutions using the MERN stack, integration of cloud databases, and robust CRUD functionality

Mathematics Tutor

Los Angeles Pierce College - CAS

Hybrid

February 2024 - August 2024

- Trained in educational psychology and individualized learning approaches, adapting tutoring strategies to students' learning styles while providing one-on-one and group instruction in trigonometry, algebra, calculus, and advanced college mathematics.
- Guided students through challenging problems by breaking complex concepts into manageable steps, emphasizing independent problem-solving, and providing in-person and online tutoring through whiteboards and Zoom.

PSE Markup Clerk

US Postal Service

Remote

August 2026 - Current

- Working with a team of Postal Support Employees to perform several clerical duties including processing mail
- Transferring across departmental positions to

Projects

Yapper - Social Media Platform

Tech Stack: MERN Stack (MongoDB, Express, React, Node.js)

- Engineered a scalable full-stack social media platform featuring user authentication, post creation, real-time updates, and direct messaging.
- Implemented follow/unfollow and feed mechanics to increase user engagement. Deployed and optimized for performance and responsiveness.

Flash AI

Tech Stack: React, Firebase, Gemini API (Google)

- Developed a full-stack SaaS platform that uses Google's Gemini API to convert user prompts into AI-generated flashcards.
- Integrated Firebase for secure, real-time user authentication and personalized data storage. Designed for scalability and seamless flashcard organization.

Additional

Technical Skills: C++, Javascript XML, Markdown, MongoDB, Firebase, Express, React.js, Node.js, Github
