

Fahim Zaman

(747)466-6597 • zamanfahim13@gmail.com • fahimz.com • github.com/FahimZM

Education

University of California, Santa Barbara

Graduated: June 2026

Bachelor of Science in Computer Science:

Relevant Coursework - Data structures & Algorithms, Object-Oriented Design, Computer Architecture, Computer Networks

Experience

Software Engineer Fellow

Headstarter AI

Remote

July 2024 - September 2024

- Collaborated with a 3-person engineering team to design, develop, and deploy five web applications during a 5-week engineering program.
- Built full-stack applications using React, Node.js, Express, MongoDB, and AI APIs.
- Implemented authentication, CRUD functionality, database integrations, and responsive web interfaces.

Mathematics Tutor

Los Angeles Pierce College - CAS

Hybrid

February 2024 - August 2024

- Provided individual and group instruction in algebra, calculus, trigonometry, and advanced mathematics.
- Broke complex problems into structured steps while adapting instruction to individual learning needs.

PSE Markup Clerk

US Postal Service

Remote

August 2026 - Current

- Process high volumes of mail according to established procedures while maintaining accuracy and attention to detail.
- Collaborate with team members across departmental operations to meet daily processing requirements.

Projects

Yapper - Social Media Platform

Tech Stack: React, Node.js, Express, MongoDB

- Engineered a scalable full-stack social media platform featuring user authentication, post creation, real-time updates, and direct messaging.
- Implemented follow/unfollow and feed mechanics to increase user engagement. Deployed and optimized for performance and responsiveness.

Flash AI

Tech Stack: React, Firebase, Gemini API

- Built an AI-powered flash card application that generates topic-specific study cards from user prompts using Google's Gemini API.
- Integrated Firebase Authentication and Firestore for persistent user data and flash card storage.
- Developed a responsive interface for generating, reviewing, and organizing flashcards.

Bloop - Break the Loop

Tech Stack: Dart, Flutter, Swift, Firebase

- Built a cross-platform mobile app that provides real-time visibility into social media usage and helps users manage application-specific screen-time goals.
- Integrated Firebase for persistent storage of user profiles, usage goals, and application limits.
- Developed configurable tracking features to monitor progress toward personalized usage goals.

Skills

Languages: Javascript, C++, Python

Frontend: React, Flutter

Databases: MongoDB, Firebase/Firestore

Backend: Node.js, Express.js

Tools: Github, Zoom, AI agents (Cursor and Claude Code)
